Eco & Design Challenge

To promote the creation of exhibition booths rich in sustainability and creativity, we have established a new "Exhibition Booth Evaluation System." This system comprehensively evaluates each exhibiting company's booth from the perspectives of environmental consideration (decarbonization and resource circulation) and design/innovation, with the organizer recognizing outstanding exhibits.

Benefits of Applying

Visualizing Corporate/Brand Sustainability Initiatives

Being recognized for environmentally conscious and creative exhibits clearly demonstrates a company's ESG (Environmental, Social, and Governance) initiatives to visitors and stakeholders.

Increased Visibility Among Visitors and Media

Receiving an award increases opportunities for the exhibit content to be featured in CEATEC's official announcements and media coverage, leading to enhanced brand recognition.

Enhancing Internal and External Awareness of Sustainability

Engaging in environmental impact reduction and innovative expression from the exhibition preparation stage fosters internal awareness reform and strengthens collaborative momentum with external partners.

ECO & Design Challenge

Voices of 2025 Award Winners

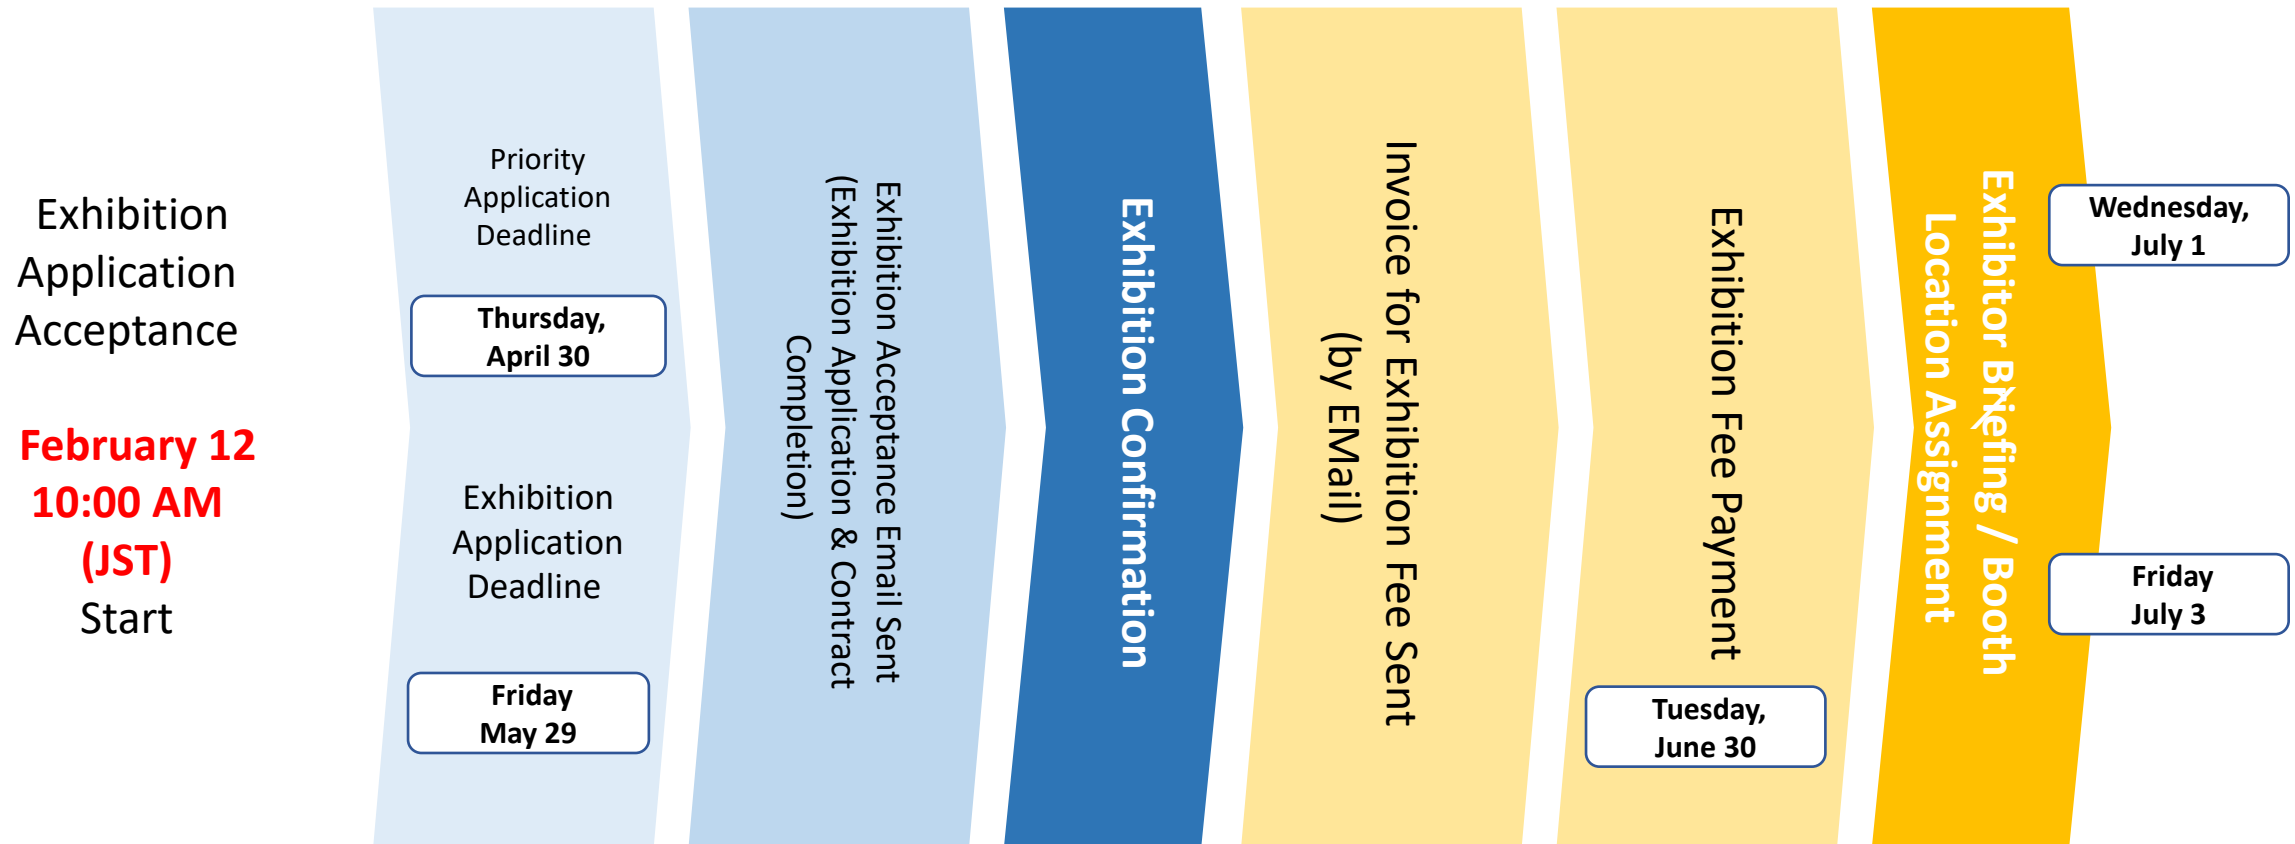

- The integrated display of brand and technology allowed visitors to tangibly experience a concrete vision of the future
- The booth design, which balanced aesthetics and sustainability, was highly praised.
- The Eco & Challenge initiative demonstrated our commitment both internally and externally, boosting internal understanding and supporting budget allocation
- Significant potential exists for learning from other companies' examples and clarifying evaluation criteria
